| Domain | Grade 6 | Grade 7 | Grade 8 |
| :---: | :---: | :---: | :---: |
| Counting and Cardinality |  |  |  |
| Operations and Algebraic Thinking |  |  |  |
| Number and Operations in Base Ten |  |  |  |
| Number and OperationsFractions |  |  |  |
| Measurement and Data |  |  |  |
| Ratios and Proportional Relationships | - Understand ratio concepts and use ratio reasoning to solve problems. | - Analyze proportional relationships and use them to solve real-world and mathematical problems. |  |
| The Number System | - Apply and extend previous understandings of multiplication and division to divide fractions by fractions. <br> - Apply and extend previous understandings of numbers to the system of rational numbers. | - Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers. | - Know that there are numbers that are not rational, and approximate them by rational numbers. |
| Expressions and Equations | - Apply and extend previous understandings of arithmetic to algebraic expressions. <br> - Reason about and solve one-variable equations and inequalities. <br> - Represent and analyze quantitative relationships between dependent and independent variables. | - Use properties of operations to generate equivalent expressions. <br> - Solve real-life and mathematical problems using numerical and algebraic expressions and equations. | - Work with radicals and integer exponents. <br> - Understand the connections between proportional relationships, lines, and linear equations. <br> - Analyze and solve linear equations and pairs of simultaneous linear equations. |
| Functions |  |  | - Define, evaluate, and compare functions. <br> - Use functions to model relationships between quantities. |
| Geometry | - Solve real-world and mathematical problems involving area, surface area, and volume. | - Draw, construct and describe geometrical figures and describe the relationships between them. <br> - Solve real-life and mathematical problems involving angle measure, area, surface area, and volume. | - Understand congruence and similarity using physical models, transparencies, or geometry software. <br> - Understand and apply the Pythagorean Theorem. <br> - Solve real-world and mathematical problems involving volume of cylinders, cones and spheres. |
| Statistics and Probability | - Develop understanding of statistical variability. <br> - Summarize and describe distribution. | - Use random sampling to draw inferences about a population <br> - Draw informal comparative inferences about two populations. <br> - Investigate chance processes and develop, use, and evaluate probability models. | - Investigate patterns of association in bivariate data. |
