PD Opportunities on SAS

Instruction & Assessment Accommodations to Meet Individual Student Needs

The goal of this course is to increase educators' understanding of the purpose and use of accommodations that can be used to help a student access academic content. Occasionally, a student that has not yet been identified as needing special services requires an accommodation for both instruction and assessment.

This course also examines the types of accommodations that may be helpful to a student as provided by general educators, special educators, EL educators, and educators in support roles such as guidance counselors and administrators. Documentation must be kept in a student's record regarding the need for an accommodation for both instruction and assessment.

This module provides 5 Act 48 hours.
